

Pushing Beyond the Boundaries of
Softness and Speed

Pushing Beyond the Boundaries of

SOFTNESS

OPTIMAL IMPLANT

- Coil softness maximized and offered in 3 softness profiles; Standard, Soft and Super Soft
- Complex coil open loop design provides stability and conformability

OPTIMAL PUSHER

- Innovative pusher design optimizes system softness and performance

- Short detachment zone improves microcatheter stability and minimizes kickback

- Progressively softer body coil ensures stability and minimal kickback of the microcatheter

- Stainless steel hypotube provides proximal support and pushability

- Unique spiral cut hypotube ensures smooth transition from hypotube to body coil for reduced friction and enhanced pushability during coil deployment

Pushing Beyond the Boundaries of

SPEED

OPTIMAL DETACHMENT

- Detachment in an instant with reliable thermal detachment system
 - <1 second detachment time
- XCEL handheld detachment controller capable of 60 detachment cycles

Ordering Information

Complete offering with a full range of Complex and Helical coils in Standard, Soft and Super Soft configurations to provide options in any clinical scenario
